Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hsieh.

Hsieh discloses the use of a percussion instrument having a head, a shell, a rim member with a plurality of openings (see figure 1), a plurality of tension lugs(15), and a plurality of casings (21), the improvement comprising a bushing, the bushing being sized to fit into at least one of the plurality of openings in the rim member, and the bushing being configured to accept the tension lug as the tension lug is inserted into one of the plurality of opening in the rim member and into one of the plurality of casings to thereby tighten the rum member to hold the head in position on the shell (see figures 1 and 2).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hsieh and LaPlante.

Hsieh does not specifically recite a bushing functioning to reduce the friction between the rim and the tension lug.

LaPlante discloses the use of a bushing (158) for the rim of a percussion instrument functioning to reduce the friction between the rim and the tension lug; and to keep vertical axial tension loads perpendicular to the upper surface of the rim.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device as disclosed by Hsieh with the function of the bushing as disclosed by LaPlante in order to provide an effective tensioning system for drum rims.

5. Claims 4-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry of a **general nature or relating to the status of this application or filed papers** should be directed to the **Group receptionist whose telephone number is (703) 308-0956**.
